

Problem 4.

- Syllable structure: $(C)V(:)(C(C))$ (NB: **wai** → **wa.i**)
 - heavy syllable: $(C)V:(C(C))$
 - light syllable: $(C)V(C(C))$
- Stress application:
 1. Primary stress on rightmost syllable.
 2. From right to left, secondary stresses are placed on alternate syllables.
 3. Whenever a heavy syllable is encountered, it is stressed. Then, Rule 2 continues to be applied to the left, starting from the heavy syllable.
