

Problem #4.

If the stop consonant in the root	and the vowel in the suffix is <i>a</i> ,	and the vowel in the suffix is <i>i</i> ,
is voiced	the stress is on the suffix.	the stress is on the root.
is voiceless	the stress is on the root.	the stress is on the suffix.

- (a) This rule holds if the root contains precisely one stop consonant. If there are two (*bhāg-a-*, *pad-a-*, *pat-i-*), or if there are none (*us-ri-*), the place of the stress can't be determined.
- (b) *mṛdh-rá-*, *phé-na-*, *stu-tí-*, *tan-tí-*, *bhār-á-*, *dū-tá-*, *sváp-na-*, *bhū-mi-*, *ghar-má-*, *abh-rá-*, *ghan-á-*, *ghṛṣ-vi-*.
