

Problem #5: Duna Numerals

Solution:

- Duna numerals follow a base 14 system. **Malura** is the word for 14.
- **malura X** means $14 \times X$
- **malura X-da Y** is $14 \times X + Y$
- Otherwise, space means addition
- Apart from the above form, a number **B** can also be stated as **A A B**, where
 - **A** is a single word number.
 - **B** can be single word or multi-word number
 - **B = A+A**
 - In such cases, **A** cannot be **malura**.
- The numbers are:
2 = **yaba**, 5 = **rebu**, 6 = **raga**, 8 = **pou**, 10 = **rabagia**, 12 = **konane**, 14 = **malura**

Duna	Translation	Duna	Translation
Malura yaba	28	Malura-da yaba	16
Konane	12	Rebu rebu rabagia	10
Pou pou malura-da yaba	16	Malura yaba-da pou	36
Malura-da rabagia	24	Yaba	2
Raga raga konane	12	Malura	14
Konane konane malura-da rabagia	24		
Assignment 2			
70: Malura rebu			
112: Malura pou			
196: Malura malura
