

Seventh International Olympiad in Theoretical, Mathematical and Applied Linguistics

Wrocław (Poland), 26–31 July 2009

Individual Contest Solutions

Problem #1. Here are the words from which the Sulka language constructs its numerals:

- *tgiang* 1, *lomin* 2, *korlotge* 3, *korlolo* 4, *ktiëk* 5, *mhelom* 20;
- *hori orom* addition, *lo* doubling;
- *a* singular, *o* plural (from 3 on).

Nouns have different forms for the two numbers (*tu*, *sngu*; *vhoi*, *vuo*). There are separate words for a foursome of coconuts, for a twosome and foursome of breadfruit (*ngausmia*, *moulang*, *ngaitegaap*).

Answers:

- (a)
 - *a ksie a tgiang*: 1 coconut
 - *o ngaitegaap a korlotge*: 12 breadfruits
 - *o ngausmia a ktiëk*: 20 coconuts
 - *o vuo a lo ktiëk hori orom a tgiang*: 11 betel nuts
- (b)
 - 2 yams: *a lo tu a lomin*
 - 14 yams: *o sngu a lo ktiëk hori orom a korlolo*
 - 15 breadfruits: *o ngaitegaap a korlotge hori orom a moulang hori orom a tgiang*
 - 20 betel nuts: *o vuo a mhelom*
