

Eighth International Olympiad in Linguistics

Stockholm (Sweden), 19–24 July 2010

Individual Contest Solutions

Problem #2.

- 1–4: *caa* 1, *lue* 2, *köni* 3, *eke* 4;
 - 5, 10, 15: $\beta\text{-}pi = 5\beta$ ($1 \leq \beta \leq 3$);
 - 6–9, 11–14, 16–19: $\alpha\text{-}ngömen = 5 + \alpha$, $\alpha\text{-}ko = 10 + \alpha$, $\text{-}e\text{-}ko > \text{-}ako$
 $\alpha\text{-}qaihano = 15 + \alpha$ ($1 \leq \alpha \leq 4$);
 - 20, 40, 60, 80: $\gamma\text{-}atr = 20\gamma$ ($1 \leq \gamma$); $caa\text{-}atr > caatr$, $eke\text{-}atr > ekaatr$
 - 21–39, 41–59, ...: $\Gamma \text{ nge } \Delta = \Gamma + \Delta$ ($\Gamma = 20\gamma, 1 \leq \Delta \leq 19$).
- (a) *caatr nge caako*: **31**, *caatr nge caangömen*: **26**, *caatr nge caaqaihano*: **36**, *ekaatr nge ekengömen*: **89**, *köniatr nge köniko*: **73**, *köniatr nge könipi*: **75**, *köniatr nge köniquaihano*: **78**, *lueatr nge lue*: **42**, *lueatr nge luako*: **52**, *lueatr nge luepi*: **50**.
- (b) *köniatr nge eke*: **64** + *caatr nge luepi*: **30** = *ekaatr nge ekako*: **94**
luengömen: **7** + *luako*: **12** = *ekeqaihano*: **19**
- (c) 21: *caatr nge caa*, 48: *lueatr nge köningömen*, 83: *ekaatr nge köni*.
