

Problem #4: Telling Time in Swahili (15 marks)

Solution:

The Swahili day begins with sunrise at 6AM. The day is broken into two time slots: 6 AM – 6 PM (morning, or “*asubuhi*”) and 6 PM – 6 AM (night, or “*usiku*”). Thus, 7 AM is literally “hour 1 morning”, 8 AM is “hour 2 morning”, and so forth. The week begins on Saturday; Saturday is literally the *first day* or day-1, Sunday the *second day* or day-2, and so on. Thus,

Saturday = *jumamosi*; Sunday = *jumapili*; Monday = *jumatatu*;

Tuesday = *jumanne*; Wednesday = *jumatano*;

Thursday (*alhamisi*) and Friday (*ijumaa*) are named differently

The Swahili names for the first seven numbers are (in parenthesis are the forms when they combine with the word *juma*): *moja* (*mosi*) = 1; *mbili* (*pili*) = 2; *tatu* = 3; *nne* = 4; *tano* = 5; *sita* = 6; *saba* = 7

The day-time pairs are named in Swahili as follows: the first word is the day; *na* and *saa* are kind of conjunctions/particles. *Robu* and *Nusu* are $\frac{1}{4}$ (quarter after) and $\frac{1}{2}$ (half past) respectively.

Assignment 1:

Sunday, 1:00 am	<i>jumamosi, saa saba usiku</i>
Sunday, 7:30 am	<i>jumapili, saa moja na nusu asubuhi</i>
Sunday, 9:15 am	<i>jumapili, saa tatu na robu asubuhi</i>
Tuesday, 12:15 pm	<i>jumanne, saa sita na robu asubuhi</i>
Tuesday, 11:30 pm	<i>jumanne, saa tano na nusu usiku</i>
Saturday, 10:30 am	<i>jumamosi, saa nne na nusu asubuhi</i>
Saturday, 7:00 pm	<i>jumamosi, saa moja usiku</i>
Saturday, 8:15 pm	<i>jumamosi, saa mbili na robu usiku</i>

Assignment 2:

<i>jumatano, saa moja na robu asubuhi</i>	Wednesday, 7:15 am
<i>jumapili, saa nne na nusu asubuhi</i>	Sunday, 10:30 am

Assignment 3:

Monday, 12:15 am	<i>jumapili, saa sita na robu usiku</i>
Monday, 10:00 pm	<i>jumatatu, saa nne usiku</i>
