

Problem 3 (25 points). Reading a book about Yao people and the Yao language, you stumble across a chapter explaining the different meanings of kinship terms with other kinship terms:

Kinship term	Description
ambu je	<i>atati jua amao</i> <i>amao jua atati</i> <i>atati jua atati</i> <i>amao jua amao</i>
atati	<i>acimweni jua atati</i> <i>mwanache wandu jua akwelume jua amao</i> <i>mwanache wandu jua atati wakongwe jua amao</i>
atati wakongwe	<i>cemwali jua atati</i> <i>mwanache wakongwe jua akwelume jua amao</i> <i>mwanache wakongwe jua atati wakongwe jua amao</i>
amao	<i>cemwali jua amao</i> <i>mwanache wakongwe jua atati wakongwe jua atati</i> <i>mwanache wakongwe jua akwelume jua atati</i>
akwelume	<i>acimweni jua amao</i> <i>mwanache wandu jua atati wakongwe jua atati</i> <i>mwanache wandu jua akwelume jua atati</i>
acimweni	<i>mwanache wandu jua amao</i> <i>mwanache wandu jua atati</i>
cemwali	<i>mwanache wakongwe jua atati</i> <i>mwanache wakongwe jua amao</i>
asiwani	<i>mwanache jua atati wakongwe</i> <i>mwanache jua akwelume</i>
mwanache	<i>mwanache jua mwanache wandu jua akwelume</i> <i>mwanache jua mwanache wandu jua acimweni</i>
yisikulu	<i>mwanache jua mwanache</i>

At the same time, you find a diagram showing a section of the family tree of a girl named Yohanna (shaded circle in the figure below). The name under each person represents the kinship term she uses to refer to them. Some words are missing:

Fifth Hong Kong Linguistics Olympiad (2023)
Problems

(a) Fill in the blanks (1—11).

(b) Now that you understand how the Yao kinship works, you're trying to test your knowledge assigning the proper kinship terms in the following kinship tree:

Fill in the blanks (12—30).

(!) No additional explanation besides the answers is required, nor will be marked.

△ Yao belongs to the Bantu branch of the Atlantic-Congo language family. It is spoken by approx. 3.1 million people in Malawi, Mozambique, and Tanzania.

$\hat{w}$ is a consonant.

○ = female □ = male == = marriage | = son/daughter [] = siblings
