

Problem 3: Luganda

Solution:

- **Luganda makes use of “genders” / noun classes**
- **The noun class that a word belongs to is marked with a prefix.**
- **The four noun classes are:**
 - *n-* → animal
 - *ka-* → small objects (diminutive)
 - *mu-* → long objects
 - *ma-* → liquids
- **Loanwords are present. (Some words are borrowed from English, but in phonetically modified form.)**
- **Loanwords do not take the prefix of noun classes**
- **The words ‘tree’ and ‘pole’ are both represented by ‘muti’ possibly because they are similar in utility for the native speakers. Similarly, ‘water’ and ‘urine’ are both represented by ‘mazzi’ and are disambiguated based on context.**

Assignment 1: Correspondence

Luganda	English	Luganda	English
<i>kantu</i>	<i>dwarf</i>	<i>nbwa</i>	<i>dog</i>
<i>muti</i>	<i>tree/pole</i>	<i>bulangiti</i>	<i>blanket</i>
<i>kagga</i>	<i>stream</i>	<i>mugga</i>	<i>river</i>
<i>nbogo</i>	<i>buffalo</i>	<i>bayibuli</i>	<i>The Bible</i>
<i>bulawuzi</i>	<i>blouse</i>	<i>kabwa</i>	<i>puppy</i>
<i>kawuzi</i>	<i>thread</i>	<i>muti</i>	<i>tree/pole</i>

Assignment 2: Correspondence

Luganda	English	Luganda	English
<i>mazzi</i>	<i>urine/water</i>	<i>mazzi</i>	<i>urine/water</i>
<i>nkoko</i>	<i>hen</i>	<i>kakoko</i>	<i>chick</i>
<i>npisi</i>	<i>hyena</i>	<i>kalifoomu</i>	<i>chloroform</i>
