Round 2

Problem 1. Kakawin (15 marks)

The Kakawin poems of Old Javanese were long narrative tales made up of four-line stanzas. In the tradition of earlier Sanskrit poetry, each line was made up of a precise pattern of *heavy* and *light* syllables.

The first section of the 11th-century CE Kakawin poem *Arjunawiwāha* (The Marriage of Arjuna) consisted of lines which followed the *śārdūlawikrīdita* metre. In this metre, all lines have the same pattern: each consists of 19 syllables in an exact pattern of heavy and light syllables, except for the last syllable which can be either heavy or light. The first three syllables of a *śārdūlawikrīdita* line are all heavy.

Below are two stanzas from the opening section of the *Arjunawiwāha*. NOTE: The letters ā, â, ê, ë, ī, ū are vowels, while ŋ, ñ, ś, š, y are consonants. You should assume that the long vowels ā, ī, ū (and possibly others) occur only in heavy syllables.

Q1.1. The first table in your answer booklet contains four more lines from the first section of the *Arjunawiwāha* (in the *śārdūlawikrīdita* metre), with their component parts (labelled A-D) jumbled. Use the rows labelled 'position (1-4)' to show the position of each word-group in its line.

Q1.2. In the second table of your answer booklet there are four more words which appear in different lines from the first section of the *Arjunawiwāha*. In the second column, enter the number (from 1 to 19) of the syllable in their respective lines on which these words begin.
